Wednesday	8:30am - 5:00pm
Thursday	8:30am - 7:00pm
Friday	8:30am - 3:30pm

Hair & Beauty

We educate and train our students to the highest standards and it is important we focus on their needs. As a result of this we need to operate in a different way from a high street salon. This is reflected in our prices.

All our services and treatments are carried out by students, under the supervision of highly qualified staff. Treatments and services may take longer than in a normal salon, as students on occasion need support and guidance from their tutors. We endeavour to maintain professionalism at all times and to deliver a high level of customer service. Provision of some services and treatments will be at the tutor's discretion.

To ensure fair access to assessment opportunities, equal opportunities for all students and a diverse range of clients, it is not possible for clients to request a specific student to work on them. All clients need to report to the reception area prior to treatments.

A skin test is required prior to colour application, for both Hair & Beauty.
Please ask at reception for details.

Hairdressing Skin Test Information

As a duty of care to our clients, it is necessary to skin test 48hrs before a colour application once in any academic year.

Beauty Skin Test Information

As a duty of care it is necessary to skin test 24hrs before an eyelash/brow tint treatment. You are also required to have an annual skin test for false lashes (glue) and for tanning treatments.

If you have a reaction you must notify the reception immediately. If it becomes very uncomfortable you must seek medical advice. A reaction can be identified by redness, the skin can become swollen, itchy and you may get a headache. If you experience any of these symptoms, you must not have the colour applied. This is a precautionary test that we do to safeguard our clients and although this test has been carried out there is no guarantee that a reaction may not occur as a result of a colouring.

You must be 16 or over to have a colour application

Body Therapy

Full Body Therapy

£12

Swedish Massage

A relaxing massage using firm but gentle Swedish massage techniques, which may alleviate stress and tension from the body, leaving you refreshed and vitalised.

Aromatherapy Massage *(Limited availability)*

A luxurious body massage using personalised soothing aromatic oil blends to restore and revitalise the mind, body & soul.

Hot/Cold Stones Massage

The body is massaged using heated/chilled stones. Tension points are massaged promoting a sense of well-being and relaxation.

G5 – Full Body Massage

Incorporated in the full body massage, this is a widely used mechanical method which produces a deeper massage to help break down tension nodules and improve circulation.

Indian Head Massage

£6.00

This ancient form of massage, performed whilst seated, uses firm yet gentle massage movements to unblock tension in the neck and shoulders.

Any of the following treatments are incorporated with the Part Body Therapy:

Part Body Therapy *(Limited availability)*

£7.50

Infra –Red

Relieves muscular aches and pains, has a warming effect on the tissues.

G5 - Part Body Massage

This is a widely used mechanical method which produces a deeper massage.

A diet and exercise routine must be maintained to gain the full benefit of the treatments.

Micro-Dermabrasion *(Limited appointments)*

Controlled Micro –Dermabrasion is a modern technique designed, with the help of a gentle mechanical peeling process, to improve the skin's regenerative capabilities and to better control specific skin conditions. It has been used for over 20 years for the treatment of skin problems such as scar tissue, pigmentation abnormalities and acne.

Facial Treatment

£15

Body Treatment

£10

Facials

the 1990s, the number of women in the workforce has increased in all countries, but the increase has been particularly rapid in the United States.

There are a number of reasons for the increase in women's participation in the workforce. One of the most important is the increasing need for women to contribute to the household income. This is particularly true in the United States, where the cost of living is high and the need for a second income is often essential.

Another reason for the increase in women's participation in the workforce is the increasing availability of job opportunities for women. This is particularly true in the service sector, where there has been a rapid increase in the number of jobs available to women.

There are also a number of social and cultural factors that have contributed to the increase in women's participation in the workforce. One of these is the increasing acceptance of women's roles in the workforce, which has been a result of the feminist movement and the changing attitudes of society.

Another factor is the increasing need for women to contribute to the household income, which has been a result of the increasing cost of living and the need for a second income. This is particularly true in the United States, where the cost of living is high and the need for a second income is often essential.

There are also a number of economic factors that have contributed to the increase in women's participation in the workforce. One of these is the increasing need for women to contribute to the household income, which has been a result of the increasing cost of living and the need for a second income.
